

Getting Started

Your first steps with MergeTasks — account setup, dashboard overview, and everything you need to start serving clients today.

Welcome to MergeTasks

MergeTasks is the all-in-one platform built specifically for promotional products distributors. From webstores and client portals to proposals, orders, and supplier integrations — everything your business needs is in one place.

01 Webstores & Client Portals

Launch branded company stores for your clients with budgets, departments, and approval workflows.

02 Proposals & Orders

Create professional proposals, collect digital approvals, and manage purchase orders end-to-end.

03 Supplier Integrations

Connect to SAGE, ASI, S&S Activewear, SanMar, and more for real-time product data.

04 AI Copilot

Let AI help you find products, draft proposals, and answer client questions automatically.

PRO TIP

Complete the onboarding wizard after your first login — it personalises your dashboard and pre-configures your account based on your business size, specialties, and goals.

Account Setup

Getting your account fully configured takes less than 10 minutes. Follow these steps to unlock the full platform.

1 Verify Your Email

Check your inbox for the MergeTasks verification email and enter the 6-digit code. This activates your account and enables two-factor authentication for all future logins.

2 Complete the Onboarding Wizard

Tell us about your business: company size, annual revenue, specialties, and target industries. This personalises your AI recommendations and dashboard layout.

3 Set Up Your Organisation Profile

Add your company name, logo, and contact details. This information appears on proposals, order confirmations, and client-facing communications.

4 Connect Your First Integration

Link your email (Gmail or Outlook), payment processor (Stripe), or supplier account (SAGE/ASI) to start syncing data immediately.

5 Invite Your Team

Add team members from Settings → Team. Assign roles (Admin, Manager, Staff) to control what each person can see and do.

SECURITY NOTE

MergeTasks uses email-based two-factor authentication (2FA) for every login. There are no passwords to remember — just your email and a one-time code. Keep your email account secure.

Dashboard Overview

Your dashboard is the command centre for your business. Everything you need is accessible within two clicks.

MAIN NAVIGATION

SECTION	WHAT IT CONTAINS
Dashboard	Revenue overview, recent orders, pending approvals, and AI-powered insights
Webstores	All your client company stores — create, manage, and monitor them here
Products	Your product catalogue, supplier connections, and AI product search
Proposals	Draft, send, and track client proposals and quotes
Orders	Purchase orders, fulfilment tracking, and supplier communications
Clients	Client directory, portal access management, and communication history
Integrations	Connect Stripe, QuickBooks, email providers, and supplier APIs
Settings	Account, team, billing, security, and notification preferences

QUICK-START CHECKLIST

- ☐ Email verified and 2FA working
- ☐ Onboarding wizard completed
- ☐ Company profile and logo uploaded
- ☐ At least one integration connected (email, Stripe, or supplier)
- ☐ First team member invited
- ☐ First webstore or proposal created
- ☐ AI Copilot tested with a product search

NEED HELP?

Use the AI Copilot (bottom-right chat icon) at any time to ask questions, get product recommendations, or troubleshoot issues. It's trained on your account data and the full MergeTasks knowledge base.
